

DOORS AND WORKTOPS

Una straordinaria gamma di finiture esclusive, dai laccati, al legno, ai vetri alle melamine hi-tech, che permette grande libertà progettuale. Una ricerca continua che offre funzionalità e soluzioni creative: essenze naturali, unicità dei marmi, materiali tecnici come l’esclusivo Iconcrete, per alte prestazioni e massima originalità.

An assortment of exclusive materials and finishes provide vast interior design potential with lacquers, woods, glass and hi-tech melamine. Continual research delivers creative functions and solutions: natural woods, the unique beauty of marble and technical materials including the exclusive Iconcrete.

L'etichettatura delle emissioni.

A garanzia di prodotti d'arredo a bassa emissione di sostanze nocive (Composti Organici Volatili).

L'arredamento domestico può influire direttamente sulla salubrità dell'aria che respiriamo ogni giorno fra le mura domestiche; è per questo che Ernestomeda realizza solo cucine che garantiscano la massima affidabilità e qualità, contenendo il livello degli agenti che potrebbero contaminare l'**aria indoor**. L'etichetta delle emissioni ha il compito di riportare ed informare circa il livello di VOC *Volatile Organic Compounds* (Composti Organici Volatili), che possono essere presenti nell'aria, in particolar modo negli spazi confinati. Come i prodotti alimentari o medicali, anche le emissioni indoor causate dall'arredamento possono influire sulla salute della persona, soprattutto in casi specifici come quello della Formaldeide, dichiarata cancerogena per l'uomo. Le cucine Ernestomeda garantiscono il minor impatto sulla qualità dell'aria in quanto certificate dal Laboratorio prove del Centro Tecnologico Internazionale COSMOB che, attraverso l'iter di certificazione CQP Indoor Hi-quality, effettua test valutativi per verificare il rispetto degli standard previsti dalla normativa ANSI/BIFMA M7.1-2011. L'etichetta delle emissioni attesta che le cucine Ernestomeda appartengono alla classe più virtuosa: la **A++**, in quanto è stato registrato un livello al di sotto di 0,500 mg/m³, lo stesso parametro utilizzato da uno dei protocolli più restrittivi in termini di emissione: il **regolamento americano LEED** (*Leadership in Energy and Environmental Design*). Le cucine Ernestomeda sono dunque conformi al regolamento LEED per le emissioni indoor rappresentando una garanzia anche per tutti coloro che progettano in ottica ecosostenibile. Ernestomeda rinnova il suo impegno nel garantire sempre la massima salubrità dell'ambiente indoor e permettere alle persone che lo abitano, di sentirsi libere di respirare un'**aria di qualità**.

Emissions labelling.

Guaranteeing furnishing products with low harmful substance (Volatile Organic Compound) emissions.

Home furnishings may directly affect the healthiness or otherwise of the air we breathe in our homes every day, so Ernestomeda only builds kitchens with the highest reliability and quality standards, keeping down the levels of substances which may contaminate our **indoor air**. The emissions label provides certification and information relating to the level of VOC *Volatile Organic Compounds* which may occur in the air, especially in confined spaces. Like foods or medicines, the indoor emissions caused by furnishings may also affect people's health, especially in specific cases such as that of Formaldehyde, declared carcinogenic in man. Ernestomeda kitchens guarantee the lowest impact on air quality since they are certified by the Testing Laboratory of the COSMOB International Technology Centre, which adopts the CQP Indoor Hi-Quality certification procedure for testing to verify compliance with the ANSI/BIFMA M7.1-2011 regulation standards. The emissions label certifies that Ernestomeda kitchens are in the highest class, **A++**, since the level recorded is below 0.500 mg/m³, the same parameter used by one of the strictest emissions protocols, the **American LEED** (Leadership in Energy and Environmental Design) **regulations**. Ernestomeda kitchens therefore comply with the LEED regulations on indoor emissions, and also provide guarantees to all those working in the area of sustainable design. Ernestomeda renews its commitment to always ensuring the most healthy indoor environment possible, giving people the certainty that they are free to breathe **quality air** in their homes.
